

ATTACHMENT H

Demonstration that Rohm and Haas meets the technical qualifications under Part 451.120 of the Commission's Regulations.

As discussed in Attachment B, Rohm and Haas Chemicals will utilize the same employees currently employed by Morton International, LLC to oversee its electricity sales and distribution. Through years of experience, these employees have gained the technical qualifications required under Part 451.120 of the Commission's Regulations. Specifically, Mr. Thomas Bielas has served as Capital Project and Facility Manager of the Ringwood complex for the past three years. Prior to assuming that position, Mr. Bielas served as Maintenance Department Supervisor at the Ringwood complex for twelve years. Mr. Bielas oversees distribution facility operations and maintenance, and has extensive experience purchasing energy, including electricity. Mr. Bielas holds a degree in civil engineering from the College of Lake County.

Rohm and Haas Chemicals will meet the technical qualifications under Part 451.120 of the Commission's Regulations in the same manner that Morton International currently meets those requirements. As a Commission-authorized ARES, Morton International currently maintains a technical staff on call 24 hours each day to operate and maintain the facilities, as needed. Mr. Bielas is on call and may be reached via an electronic pager on a 24 hour basis. Mr. Bielas also is available on a 24-hour basis to coordinate with its single end user regarding any planned or unplanned curtailments or interruptions. The three contractors listed on Attachment J also are available to operate and maintain Morton's facilities on a 24-hour basis. Rohm and Haas Chemicals will assume these duties once it receives ARES certification.
